Industry Standard Work Tables

Our stainless steel tables are designed in the United States and manufactured in China. They are the highest quality work tables in the industry.

Built to last a lifetime, we use a three channel design to maximize table strength. All other manufacturer's tables fall short.

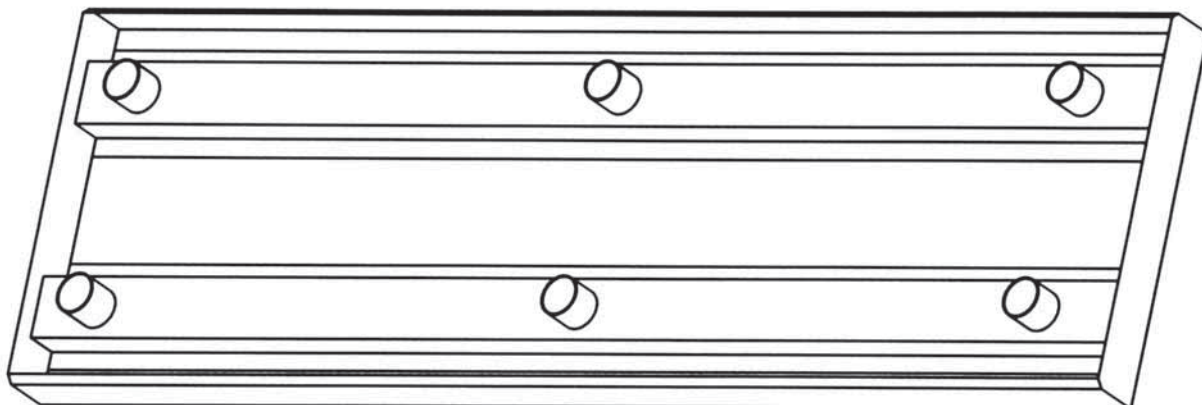

Klinger's tables have extra channels to maximize strength and durability. We also offer a large under shelf compared to others.

Shown below: **SG-30x96**

The competition's tables use two channels making them unstable, bending in the middle over time. They also have a narrow under shelf.

Shown below: **30" x 96"** (Competition's Table)
